Freelancing as a full-stack developer while seeking out full-time positions in the civic technology field.

EXPERIENCE

Various Clients

Freelance Full-Stack Developer

Remote

01/2020-10/2020

- Built web applications and sites using Node.js and Vue.js for a jewelry appraisal company, writer, & other clients
 - Began my freelancing on Upwork after web development self study in 2019 (via [The Odin Project](#))
- Built log management application from end to end in Django for a startup in the cybersecurity compliance space
- Built ETL pipeline for AI startup to be able to get their clients' HR/IT ticketing data from clients' service providers
 - Implemented performant (~500 rows/sec) solution that can be run at time intervals; documented all of it
 - Easily configured and extended (with ServiceNow & Jira Service Desk supported out of the box)
- Worked on front-end (Vue.js) & back-end (Django API with PostgreSQL DB) of enterprise application for a client

Code Nation

Front-End Coding Instructor Volunteer

Brooklyn, NY

09/2018-06/2019

- Taught the Foundations Course at Williamsburg Charter High School 2 days a week for the 2018-19 school year

IBM Research

Software Engineer

Yorktown Heights, NY

02/2017-07/2018

- Helped build and maintain API Harmony, a catalog of web APIs that helps developers find and use APIs
 - Implemented walk through tour for the application, developed admin site for it in Ruby on Rails
- Developed Business Process Management software for event processing, monitoring, and analytics via cloud
 - Wrote scripts, stored events in Elasticsearch, built user-facing dashboards for KPIs, wrote documentation

Pandora Media, Inc.

Software Engineer Intern

Oakland, CA

06/2015-08/2015

- Overhauled Pandora Developer Center, web portal through which partners like car manufacturers accessed API
 - Restructured registration, sign-in, license acceptance, and dev management to decrease admin overhead
